SKILLS

- **Languages**: C++, Python, SQL
- **Frameworks**: HTML, CSS
- **Tools/IDEs**: MySQL, IDLE
- **Data Science:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Data Cleaning, Predictive Modeling
- **Soft Skills**: Problem-Solving,Quick Learner,Work Ethic and Adaptability

PROJECTS

- **Amazon Sales Analytics Dashboard:** Dec' 2025
  - Built and visualized an interactive Amazon sales dashboard to track key business metrics such as total sales, orders, product categories, payment methods, and order fulfillment status for actionable insights.
  - Analyzed sales trends and customer behavior, identifying high-performing categories, preferred payment modes, and country-wise sales distribution to support data-driven decision-making.
  - Implemented forecasting and interactive filtering, enabling trend analysis over time and dynamic exploration across multiple dimensions.

  Tech: Power BI, Power Query, Data Modeling (Star Schema), Data Cleaning & Preprocessing, Sales Analytics, Dashboard Design, Trend Analysis.
- **Superstore Sales Analysis Project**: Apr' 2025
  - Developed a data-driven sales analytics system using Python to process, clean, and analyze large retail datasets for uncovering business insights.
  - Implemented automated data preprocessing pipelines to handle missing values, convert data types, and transform date field for accurate time-series analysis.
  - Implemented advanced exploratory data analysis (EDA) to uncover patterns in sales, profit, discount impact, and regional performance using Pandas, Matplotlib, and Seaborn.

  Tech: Python, Pandas, NumPy, Matplotlib, Seaborn, Data Visualization & Statistical Analysis.
- **IPL Performance Analytics Dashboard**: Mar' 2025
  - Designed and deployed an interactive IPL performance dashboard to analyze team and match trends, including toss decisions, win probabilities, and season-wise outcomes for data-driven insights.
  - Performed data cleaning, preprocessing, and transformation using Excel ensuring accurate and analysis ready datasets before visualization.
  - Generated insights on team performance patterns, identifying winning strategies, venue-wise trends, and match outcome factors for strategic evaluation.

  Tech: Tableau, MS Excel, Data Cleaning & Preprocessing, Performance Analytics, Trend Analysis.

TRAINING

- **Mastering C++: From Object-Oriented Programming to Dynamic Programming — Centre for Professional Enhancement, LPU|** Jun'2025
  - Completed an intensive training program focused on problem-solving and algorithmic optimization for real-world and competitive programming applications.
  - Implemented advanced data structures (Arrays, Strings, Linked Lists, Stacks, Queues, Trees, Graphs).
  - Enhanced coding efficiency, optimized algorithmic logic, and improved time and space complexity performance in competitive environments.

CERTIFICATES

- Privacy and Security in Online Social Media | NPTEL May' 2025
- Fundamentals of Network Communication | Coursera Oct' 2024
- The Complete python Course including the Django Web Framework | Infosys Dec' 2023

EXTRA CURRICULAR ACTIVITIES

- **LPU Innovation Hackathon:** Mar' 2024
  Organized by Team 7 in collaboration with BlockSeBlock

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.47*** *Aug'2023* – present
- **Narayana Junior College** Hyderabad, Telangana
  Intermediate: ***Percentage: 95.6%*** *Mar'2021 – Mar'2023*
- **Sri Vivekananda English Medium High School** Anantapur, Andhra Pradesh
  Matriculation: ***CGPA: 10.0*** *Mar' 2020 – Mar'2021*
